EXPERIENCE

Senior UX Manager

Best Buy Technology Development Center / Seattle, WA
January 2020 - Present

Implemented multiple new design practices with our design partners and cross functional teams. This created more efficient collaborative work across our organization.

Doubled the size of our team and increased our reach from one product to three products, all while maintaining 100% retention rate with the UX team for over 24 months.

Initiated multi quarter, cross team information architecture strategy for the iOS and Android applications. Redesign is focused on expanding capabilities while reducing overall footprint of application.

UX Manager

Best Buy Technology Development Center / Seattle, WA
September 2018 - January 2020

Created the first digital membership platform team. This team has tripled in size and has doubled its rate in customer acquisition and engagement.

Led a vision with crossfunctional partners to define an experience vision for 1, 3, and 5 years. This allowed for more rapid and cross team road map planning.

Facilitated the first research projects that gave our business partners and UX leadership more insight into our post-purchase experiences and is the basis for our current customer engagement model.

Design Director

INRIX / Kirkland, WA
January 2017 - September 2018

Managed a team of designers responsible for the creation and execution of a complete in car application ecosystem. We worked directly with content providers and OEMs to deliver user centered, safety compliant applications.

Oversaw design team and strategy for a suite of web-based traffic analytic tools. These powerful applications allowed users from all across the world to view, understand, and share millions of data points in easy to understand visualizations.

UX Design Lead

INRIX / Kirkland, WA

January 2016 - January 2018

Managed a team of UX designers, while also contributing IC work focused on in-car, mobile, and web experiences. We innovated and executed key features and experiences for consumer and sales applications.

Design Achievements:

- Successfully implemented Parking Features into INRIX's mobile application and SDK after acquisition of Parking data provider ParkMe. This helped increase parking services revenue 8X in 1 year.
- Leveraged direct customer feedback along with current business goals to create a shift in mobile application strategy. This helped create more product offerings and higher customer satisfaction rating. .

Sr. UX Designer

INRIX / Kirkland, WA

October 2012 - January 2016

Designer charged with defining and solving core user problems as defined by user research, mobile analytic, and customer feedback. Designed user experiences for consumer mobile products (both iOS & Android).

- Shipped multiple successful releases. Android and iOS applications both reached 5 stars in their respective stores.
- Designed user experiences for B2B platform offerings.

UI/UX Designer

Gripwire / Seattle, WA

October 2011 - October 2012

UI/UX Designer

Free & Clear / Seattle, WA

September 2009 - October 2011
